And we provide more information about the voltage and frequency. Why is Mozambique a major energy exporter?Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) - South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities. Does Mozambique have a high energy demand?Mozambique's domestic energy demand is increasing steadily and is expected to continue rising as the country industrializes. The Southern African Development Community (SADC) member countries are expected to have higher demand for power that could be met with Mozambican exports. When did independent power projects start in Mozambique?The first Independent Power Projects (IPPs) in Mozambique came online in . These projects have paved the way for future IPP negotiations and, more recently, the standardization of tendering documents. Given EDM's weak financial capabilities, future IPPs will continue to rely on development banks for financing. What is EDM doing in Mozambique?EDM and Mozambique support the development of renewable energy projects, having launched public tenders for solar and wind projects, the country is also exploring battery storage solutions. The largest power generation plant in the country is the Cahora Bassa hydro dam, operated by the government owned Hidroelectrica de Cahora Bassa (HCB).
