

# Uninterruptible power supply prices for domestic use in Armenia

## Uninterruptible power supply prices for domestic use in Armenia

How much does electricity cost in Armenia? Armenia, March : The price of electricity is 0.109 U.S. Dollar per kWh for households and 0.081 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes. Does Armenia have a surplus electricity sector? The Armenian electrical energy sector has had a surplus capacity ever since emerging from a severe post-Soviet crisis in the mid-1990s, thanks to the reopening of the Metsamor Nuclear Power Plant, which was built in and supplies over 40% of the country's electricity. How has Armenia restructured its energy sector? Prompted by a severe electricity supply crisis in the mid-1990s, Armenia has revamped its energy sector over the past 20 years. Parts of the sector have been privatised, some companies have been restructured, most households now have access to gas, and cost-reflective tariffs have been introduced. Why does Armenia need a single energy supplier? Armenia relies on imports of natural gas and oil for most of its energy needs, which exposes it to supply risks and dependence on a single supplier. As the government considers energy security and the development of indigenous sources to be of prime importance for the energy sector, renewables and efficiency measures are key areas. How can Armenia synchronise its energy system with its neighbours? To synchronise its system with those of its neighbours and provide electricity at competitive prices, Armenia will have to open its relatively closed electricity market. The Ministry of Territorial Administration and Infrastructure (MTAI) is responsible for developing and implementing energy policy. How does Armenia import natural gas? Natural gas is imported from Russia via pipeline through Georgia, but also from Iran through a barter agreement under which it exports electricity in exchange. Armenia also trades electricity with Georgia, though volumes are low since the countries' networks are not synchronised. The RA Public Services Regulatory Commission reports that the daily tariff for households will range from 46.48 drams (12 cents) per kilowatt hour to 53.48 (13.8 cents), depending on consumption. Tariffs "Electric Networks of Armenia" CJSC "Electric Networks of Armenia" CJSC tariffs for the electric energy supplies to consumers ( According to the decision N 0 478-N of the PSRC of RA dated Armenia electricity prices, March | GlobalPetrolPrices The residential electricity price in Armenia is AMD 0.000 per kWh or USD .
