

100ah power station in China in Mozambique

100ah power station in China in Mozambique

Does Mozambique have a high energy demand? Mozambique's domestic energy demand is increasing steadily and is expected to continue rising as the country industrializes. The Southern African Development Community (SADC) member countries are expected to have higher demand for power that could be met with Mozambican exports. Does Mozambique have a major energy transition strategy? Across Mozambique there are significant hydro, solar and wind growth plans, particularly in the north of the country. The strengthening of the Northern grid will enable greater penetration of renewables in Mozambique over time. The country's President, Felipe Nyusi recently announced a major energy transition strategy at the COP28 summit in Dubai. When did independent power projects start in Mozambique? The first Independent Power Projects (IPPs) in Mozambique came online in . These projects have paved the way for future IPP negotiations and, more recently, the standardization of tendering documents. Given EDM's weak financial capabilities, future IPPs will continue to rely on development banks for financing. Why is Mozambique a major energy exporter? Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) - South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities. What is the largest power plant in South Africa? The largest power generation plant in the country is the Cahora Bassa hydro dam, operated by the government owned Hidroelectrica de Cahora Bassa (HCB). HCB sells 65% of its existing generation to South Africa, and the remaining 35% is sold to the northern regions of Mozambique and to Zimbabwe. How will the Mozambique power project impact the economy? Expected Impact: Economic Development: the project will significantly improve the quality of power supply and electricity in the central and northern regions of Mozambique, especially the provinces of Zambezia and Nampula which have the lowest electricity access rates in the country (25% and 18% respectively).
