

Finnish solar Glass Company

Finnish solar Glass Company

Who makes insulated glass in Finland? By the end of the decade, Tahti-lasi was the biggest insulated glass producer in the Finnish market. They differentiated themselves with long-term quality warranties and were among the first in the world to offer double, triple and even quadruple-glazed glass. Who is Finnglass? Finnglass was founded in 1978, originally under the name of Tahti-lasi, to manufacture insulated glass in the time of the energy crisis. Glass companies seemed to appear out of thin air to compete for market share in the exploding insulated glass business. Why should you choose solar Finland? Solar Finland and its subsidiaries with strong long-term background are experts in all aspects of solar energy. Our extensive know-how and experience of over 40 years make it possible to develop in different areas making our products and services competitive in the solar energy markets both domestically and abroad. Who owns Finnglass? All operations from designing to manufacturing under one roof. We support our customers in their project from start to finish. Current owners, Timo Saukko and Markku Manninen, took over Finnglass in a management buy-out from the French glass-giant Saint-Gobain in 2015. For the co-owners, this meant going back to the roots. How has Finnglass changed over the years? Since Finnglass was founded in 1978 in Alavus, Finland, the company has gone through mergers, acquisitions and lastly, a management buy-out before becoming what we are today. Throughout these times of change, one thing remains the same - Finnglass's ability to meet and exceed customer expectations with unparalleled innovation and quality. Does Finnglass work with external partners? The only operations performed in part with external partners is R&D, where Finnglass works with several leading universities around Europe to innovate new disruptive technologies.

Finnglass was founded in 1978, originally under the name of Tahti-lasi, to manufacture insulated glass in the time of the energy crisis.

Company | Innovative and high-quality glass Since Finnglass was founded in 1978 in Alavus, Finland, the company has Finnish glass maker offers PV systems integrated into glass Sep 3, Finland-based Lumon has integrated balcony PV modules into a glass parapet, maintaining the facade's appearance without visible technical components.
