## High Frequency Inverter Kit

What is a high frequency inverter? A high frequency inverter is a type of UPS (Uninterruptible Power Supply) that uses a microprocessor as its process control center. It employs software programming to control its operation, unlike traditional analog circuits. What is a high frequency inverter block? The high frequency inverter block alone consists of a high frequency oscillator, a MOSFET driving stage to provide necessary current to drive the ferrite core transformer. The transformer outputs 220VAC at several KHz which is not suitable for home appliances, so the high frequency must be converted to 50 Hz before feeding to a load. What is included in a sine wave inverter kit? The price includes - 2 igtbs , 1 scr , heatsink , multiwinding transformer , 2 kits and capacitor. Being one of the trusted firms in the industry, we are highly engaged in providing a unique range of Sine Wave Inverter Kit.
