Conferences > 4th International Confer In order to meet the high power and high stability requirements of communication base stations for power supply, this paper designs a dedicated 500W switch power supply for communication base stations. What is a 3G base station converter? In a 3G Base Station application, two converters are used to provide the +27V distribution bus voltage during normal conditions and power outages. What types of power systems are used in communications infrastructure equipment? Communications infrastructure equipment employs a variety of power system components. Power factor corrected (PFC) AC/DC power supplies with load sharing and redundancy (N+1) at the front-end feed dense, high efficiency DC/DC modules and point-of-load converters on the back-end. What is a preferred power supply architecture for DSL applications? A preferred power supply architecture for DSL applications is illustrated in Fig. 2. A push-pull converter is used to convert the 48V input voltage to +/-12V and to provide electrical isolation. Synchronous buck converters powered off of the +12V rail generate various low-voltage outputs. How to choose a power supply topology for a multi-output DSL converter? Selection criteria for the power supply topology in multi-output DSL converters include requirements for performance (high efficiency and tight load and line regulation), simplicity, low cost and a small footprint with a low profile. High performance is achieved by selecting the appropriate topology and control circuit. What is a low profile power supply? Low profile power supply design usually includes printed circuit board (planar) power transformers and output inductors and surface mount input and output capacitors. Multiple output power supplies are often implemented with a multi-output flyback converter. Power transformers play a vital role here: they adjust the mains voltage to levels compatible with the base station's operational needs, supplying power to critical systems such as communication devices, air conditioning units, and lighting.
